Education: The College of Saint Rose
Hudson Valley Community College

Work Experience:

New York State Department of Labor *Title: Senior Information Technology Specialist II*
WA Harriman Building *Dates: 1/05 to Present*
State Campus
Albany, NY 12240

Duties:

As part of the Planning and Technology Applications Development unit my duties are the programming and trouble shooting of current applications for the DOL (Department of Labor) internet and intranet. New applications are developed in Drupal. Current applications are maintained in ASP using Dream Weaver, Sublime, and Edit Plus. I have experience in design and development, and maintenance of databases in access, SQL Server, and Oracle for DOL applications. I have worked directly with the DOL Database Group, Helpdesk Support Group, and OFT in development, implementation and maintenance of systems for DOL. I am also an Interwoven Teamsite administrator for the DOL internet. I am currently responsible for maintaining user access and content internet website, and intranet website. I am part of new application development and ADA compliance team. I worked directly with other departments in DOL and OFT to develop maintain and trouble shoot DOL applications. I have reverse engineered Oracle databases for the development of a Primavera web based application. I have worked on developing new code, and repairing old code to prevent SQL injection attacks against the DOL websites. I have created documentation for use in training and development of other DOL employees. I was responsible for the documentation and mapping of DOL systems for future maintenance. Prior to working for Planning and Technology I worked for the Communications Group developing and maintaining web applications for the DOL internet and intranet.

New York State Unified Court System *Title: Senior Computer Applications Programmer*
125 Jordan Road *Dates: 12/00 to 1/05*
Troy, NY 12180

Duties:

Since December of 2002 I have been working in the Administrative Systems Group on the UBS team as an HTML/Java Senior Computer Applications Programmer. The project required the use of Java, HTML, JavaScript, PL/SQL, and Oracle Portal. As a team member I worked the hours need to get the project completed, and into production on time. I developed a Portal Application that tracks all the help documentation for the project, and allows the Budget Office to review the documentation and make changes when needed. I am currently working on UBS changes, and fixes, and getting ready for phase two of the project.

I was in the Oracle Portal Group as an Oracle Portal Administrator for approximately on year. Duties involve the design and development of new Portal applications for the Court Systems. In charge of the development of Portal training media, course outline, class scheduling, and classroom instruction of Portal. Involved in the migration of current Oracle WebDB production applications to Oracle Portal. Setting standards for Portal users to use in their applications. Testing applications prior to being moved into production. Management of security settings, and user rights for Portal users. I am responsible for the development and maintenance of the Portal Group web site. Educating and assisting Portal users, and developers in achieving a complete solution.

Duties while a member of the Administrative Systems Group for the first year were as follows. Support of the DoT Employee website using Oracle WebDB. Administrator of the Administrative Group website. Applications development, support, and maintenance of various programs in the Administrative Group. Migration of the Judge tables from Sybase to Oracle. Development of an ASP application to check data integrity of incoming Chase Bank files for Attorney Registration. Application improvements to the existing Court Profiles web application. Creation of FTP batch files for the export of data, and application files to FIM users at various state locations. Development of a new ASP/Mapmarker application to cleanse Preferred Data files. To prepare presentations for new Preferred Data application to be given to the Administrative, and Web groups.

Bryant Stratton College
1259 Central Ave.
Albany, NY 12205

Title: Instructor in the Computer Information & Systems Department
